Test Plan: Swag Labs (saucedemo.com)

This plan has five test cases, one for each bug in the bug report, ordered from the fault that is hardest to notice to the easiest.

1. Scope

Tested: the product catalog and its sort filter, the product detail page, and both checkout pages (Your Information and Overview), using three accounts: `performance_glitch_user`, `error_user` and `problem_user`.

Not tested in this plan: the login page and the locked-out user, the cart page on its own, and automated regression.

2. Types of testing

- **Functional testing:** product description, sorting, last name field and the Finish button
- **UI observation:** what each page shows compared with what it should show
- **Performance observation:** the time taken to return to the catalog for the slow user, noted by eye from a screen recording

3. Environment

Item	Detail
Site	https://www.saucedemo.com (Swag Labs)
Browser and OS	Microsoft Edge on Windows
Selenium version	
pytest version	

4. Test data

Data	Value
Usernames	performance_glitch_user, error_user, problem_user
Password	secret_sauce
Checkout details	A first name, a last name and a postal code (the screenshot for Bug 3 uses postal code 736101)

5. Test cases

The order runs from the fault that is hardest to notice to the easiest. Each case failed in testing and matches a bug in the bug report.

TC-01: Return to the catalog from a product page

Field	Detail
User	performance_glitch_user
Steps	1) Log in. 2) Click a product, for example Sauce Labs Backpack. 3) Click Back to products and time how long the catalog takes to appear.
Expected result	The catalog opens instantly
Actual result	The catalog takes 3 to 4 seconds to open, whatever the network
Status	Fail (Bug 1, Low)

TC-02: Product description on the detail page

Field	Detail
User	error_user

Field	Detail
Steps	1) Log in. 2) Click Sauce Labs Bolt T-Shirt to open its detail page.
Expected result	The page shows the name, price, button and a description of the product
Actual result	Only the name, price and Add to cart button show; there is no description
Status	Fail (Bug 2, High)

TC-03: Sort products by price

Field	Detail
User	problem_user
Steps	1) Log in. 2) Open the sort dropdown on the catalog and choose a price option.
Expected result	Products reorder by price, from $7.99 up to $49.99 for low to high
Actual result	The products stay in their original order
Status	Fail (Bug 4, High)

TC-04: Finish the order

Field	Detail
User	error_user
Steps	1) Log in and add Sauce Labs Bike Light. 2) Open the cart and click Checkout. 3) Fill in the information page and click Continue. 4) On Checkout: Overview, click Finish.
Expected result	The order is placed and a confirmation page opens

Field	Detail
Actual result	Nothing happens; the page stays on Checkout: Overview
Status	Fail (Bug 5, Critical)

TC-05: Enter a last name at checkout

Field	Detail
User	problem_user
Steps	1) Log in, add a product and click Checkout from the cart. 2) Type a first name, a last name and a postal code.
Expected result	All three fields keep what was typed and Continue opens the overview
Actual result	The Last Name field stays empty whatever is typed
Status	Fail (Bug 3, Critical)

6. Risk assessment

The riskiest areas are the ones that stop a customer from paying, because a broken step there loses the sale.

Rank	Area	Why it ranks here	Linked bug
1	Finishing the order	No confirmation means no completed sale and no way for the customer to know	Bug 5 (Critical)
2	Checkout information form	A field that cannot be filled blocks every order	Bug 3 (Critical)
3	Login	If login fails, nobody can shop; no bug was logged in this report	None logged
4	Product detail page	A missing description makes buyers hesitate	Bug 2 (High)

Rank	Area	Why it ranks here	Linked bug
5	Catalog sorting	Shoppers can still find products, but the filter looks broken	Bug 4 (High)
6	Page speed	A short delay annoys customers but does not stop an order	Bug 1 (Low)
